## **Text Issues Highlighted**

Please note that you can find the key for the colours used to highlight issues in this text on the first page of this report, in the "Text Quality" and "Writing Style" sections.

#### High Commendation Award at Indian International Model United Nation (IIMUN)

I was awarded "High Commendation" at Indian Internal MUN (chapter 2). I was a part of the United Nations Human Rights Council. The country allotted to me was Syria and the agenda given was also related to Syria. I had prepared for about a month for the same. On conference day 1, I raised two moderated cocuses on two topics. My strategy was to form an alliance of all the small nation and to take on the big ones. By the end of conference day 1, however, seeing the speed at which our block formed, the VETO nation Russia also became a part of our block. The confidence with which I represented my country in the given agenda, I think, made an impression in my committee chair's eyes. I led my block and worked over night with people from different places to draft the resolution. In this process, I learned two major things: a. Researching: Since my country was a small one, and with a huge crisis, I had to do a lot of background research. I mainly focused on topics like my finance, reading about my allies and the power of my opposition. b. Cooperation and Problem-Solving: Since the block we formed included 40 delegates from different places representing different nations, everyone had their own agenda and solutions. I learned how to confidently and calmly keep my point while cooperating with others as well.

This helped me gain confidence, public speaking skills as well as leadership. Apart from this I made some really close friends at the conference and had a lot of fun.
